Galaxy Precision has implemented a quality management system that exists as part of a larger, overall management system to establish, document, and implement our quality policy and related processes for providing products and services which meet or exceed customer requirements and those of ISO 9001:2015.

Galaxy Precision has adopted the process approach advocated by ISO 9001:2015, by defining and managing process inputs, controls and outputs to ensure the desired results are achieved and by managing the interfaces between interrelated processes to ensure system effectiveness is maintained.

Quality Policy

Our commitment to customer satisfaction is achieved by providing quality products as specified, delivered on time, at a competitive price.

We are also committed to continually improving all areas of our operations through employee development, involvement and new technology.

Continual Improvement

Our commitment to keeping up with industry demands is enhanced by using equipment and software advancements.

This is what sets us apart from many other turning / milling / machining companies.

Along with purchasing new equipment, we use software that includes GibbsCAM for CNC programming, Solidworks CAD for 3D drawings and JobBOSS² Total Shop Control to track all production activities.

Our desire to maintain a modern and clean manufacturing facility allows us to continually expand upon our CNC capabilities making us a cost-effective solution for your machining needs.

Scope

Complete part manufacturing including machining and related processes of components.

Customer Satisfaction

Our goal is to meet your company's demands and exceed your expectations. Contact us today and let us put our skills and capabilities to work for you!

Manufacturing Processes

For over 30 years, since 1990, our CNC machining company has proudly worked with local and region-based manufacturers to turn, mill and produce a wide variety of quality custom parts for new equipment manufacturers. At Galaxy Precision we strive to maintain a reputation for flexibility, quality, and modernization.

At Galaxy Precision, we can also deliver on orders ranging in quantity from a single piece / prototype to high volume production runs of thousands of pieces.

Our flexibility even extends to our ability to manufacture parts based off of elaborate CAD files, digital and hand drawings, as well as existing sample parts.
